

Participation report on the final workshop in Bordeaux, France in Leonardo da Vinci project *EVive*

Bordeaux's meeting took place in the period 19-21 of May, 2015 and the participants were from all seven nominalised institutions in the project from Germany, United Kingdom, Romania, Bulgaria, France and Turkey.

On the date of 19.05.2015, at 14.30 we were presented on the announced place – Cap Ulysses, Rue Marengo 5, where we met the other colleagues from Leonardo project. Here we were made welcome from the coordinator of the project and his team and also from the hosts.

Some little discussions were followed with the presentation of the France educational values system, in some slides, and we supposed to be or not agreed with them on the basis of arguments, and after they presented the point of view of France. The project coordinator presented the final meeting agenda.

Once the opening workshop was in, it was passed on the discussion about vocational training values exposed by a director of a training educational values director. We continued with one visit at high school *Les Menuts* where we were expected by the leading team of them, the school was visited, its professional parts, economics and hairdresser, with some other details about the teachers. Some laboratories and the hairdresser room were presented, then we had some discussions with teachers and specialists from that school.

Around 17.15 p.m. the visit was over, and it took place the informal meeting at Fred Restaurant, invited there by the hosts. Here we had informal discussions about personal values, sharing national and international values, opinions about the visits across the project time.

Second day, starting with 9 a.m., we discussed the values, missing documents on the project platform for each country. After a short review it was a brainstorming about the following topics:

- What other values can be added?
- What are the specific competences?
- What are the strategies of teaching-learning promoted?
- How they can be integrated, can be taught?
- Which are the assessment modalities?
- What are the specific values of vocational system?

Each group/country presented their own point of view about all the topics and after lunch it was presented an personal material about „lessons learned” in the project. After we had a guided visit on old town and cathedral St Andre.

Day of 21.05.2015, begin also at 9 a.m with a dates presentation about the brainstorming session of the other day, completed by the educational values system in vocational schools by the students/learners.

Were established concrete tasks about the final documents, Final report of the final meeting in Bordeaux, all the documents uploaded on the project site in each country language, Final Report to be sent to National Agencies and uploaded documents on EST Database. Were also talking about the future projects, now that we have an curriculum for european educational vocational values. I suggested to continue with a project in which the final tool it will be a book, an illustrated book destined to children from gymnasium, based on the curriculum we made, in order to teach the european vocational values. This idea was very well received by every participants. At midday the final meeting was closed, everybody thanked to the hosts for their ospitality, hoping in a future collaboration.

We consider that the final meeting was very productive, all the points were touched, all the questions were answered. We are sure that one european curriculum of values in the vocational schools was done perfectly, that is why we consider that all the objectives and the aims from the Evive project were touched.
