

INTERNATIONAL PROJECT
EVIVE

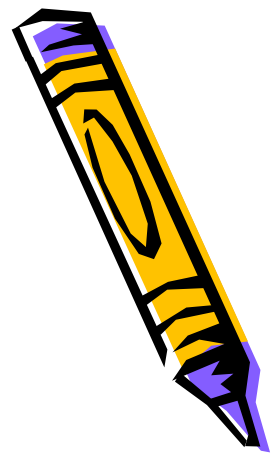

**European Values in Vocational
Education**

Elena-Lucia Mara
Lucian Blaga University of Sibiu, Romania

International Project Evive

European Values in Vocational Education

In this project we learned:

1. **to create** an international definition of values
 - moments of personal reflections which conduct to debates in order to get in the depth of the multiple senses of the values

International Project Evive

European Values in Vocational Education

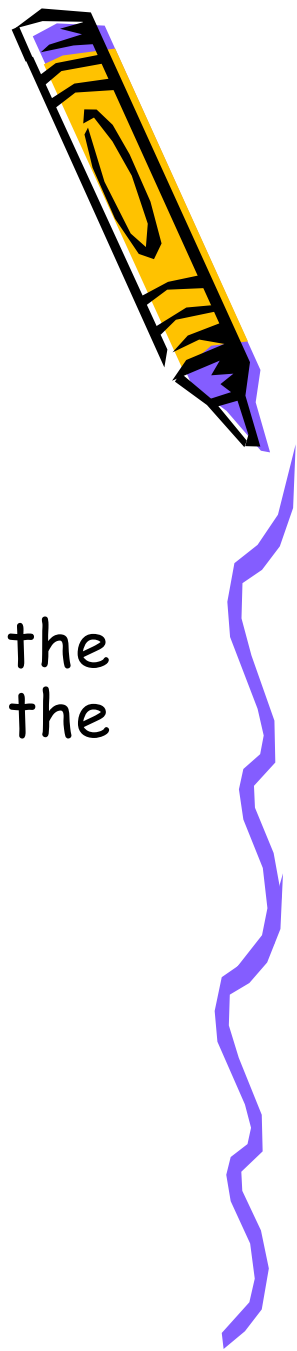

2. to think harder about the meaning of values and value systems in the curricula of our schools, especially on those vocational schools.
- making the teachers to understand the importance of this value in the teaching process

International Project Evive

European Values in Vocational Education

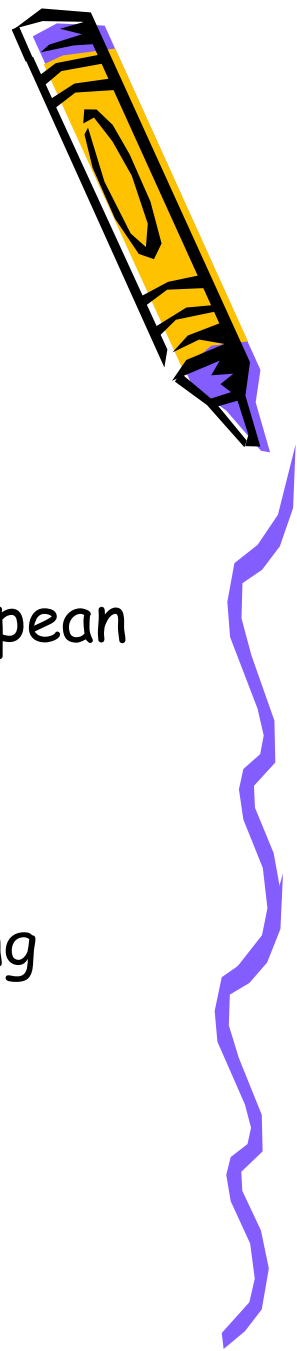

3. to compare the Romanian values with the European values in VET and to notice the cultural differences between them

International Project Evive

European Values in Vocational Education

4. to share an international curriculum of European values

- adapting the pre-universitary curricula to this European common values and to create some operational objectives with references in forming attitudes and values

International Project Evive European Values in Vocational Education

Thank you for everything we learned!
