
Lessons learned in the EVive project

*The fifth EVive-Workshop
Bordeaux, 19th to 21st of May 2015*

Marilou BREDA

Lessons learned

- European values are promoted but there is not enough legibility: they are implicit, transverse, not official
- Different meanings and impacts under the same umbrella
- The promotion of European values is possible as a topic and/or through the pedagogy implemented

Within our professional practices

- **Already integrated in our professional practices but reinforced thanks to the EVive project**
- **Guided visit with foreign trainees: topics related to values**
- **Reflection within our team: develop the promotion of European values, adapt the didactical materials...**
